# Assets and Files

Hey, Philipp here!

I'd like to tell you, that my platform **Go Web Examples Courses** just launched. Enjoy easy to follow video courses about web development in Go. Make sure to check out the special offer I have for early supporters.

We'll see us over there! :)

## Assets and Files

This example will show how to serve static files like CSS, JavaScript or images from a specific directory.

```
// static-files.go
package main

import "net/http"

func main() {
    fs := http.FileServer(http.Dir("assets/"))
    http.Handle("/static/", http.StripPrefix("/static/", fs))

    http.ListenAndServe(":8080", nil)
}
```

```
$ tree assets/  
assets/  
├── css  
    └── styles.css
```

```
$ go run static-files.go  
  
$ curl -s http://localhost:8080/static/css/styles.css  
body {  
    background-color: black;  
}
```
